

WALEED AHMED KORASHY

Asyut, Egypt | +20 110 041 2002 | wqorashy@gmail.com | [linkedin.com/in/waleed-korashy](https://www.linkedin.com/in/waleed-korashy) | github.com/waleedkorashy | waleed-portfolio.pages.dev

PROFESSIONAL SUMMARY

Fresh Computer and Information Technology graduate targeting a Junior Full Stack .NET Developer role. Hands-on experience building full-stack web applications with C#, ASP.NET Core, ASP.NET MVC, ASP.NET WebForms, ASP.NET Web API, Entity Framework, LINQ, and SQL Server/T-SQL, plus front-end development with JavaScript, TypeScript, jQuery, HTML5, CSS3, Bootstrap, React, and Angular. Comfortable consuming REST APIs, working with JSON, testing endpoints in Postman, and deploying to IIS. Built and shipped two full-stack, AI-integrated web applications — including a graduation project — both deployed live with public source code. Strong problem-solving skills and quick to adapt to new tools and frameworks.

EDUCATION

Bachelor of Computer and Information Technology

The Egyptian E-Learning University (EELU) | 2020 – 2024 | GPA: 3.04/4.00

PROJECTS

OutfitMaker — AI-Powered Fashion E-Commerce Platform | *Originally EELU Graduation Project (2024, Grade: A+) — since rebuilt and expanded*

Live Demo: outfit-maker.wqorashy.workers.dev | **GitHub:** github.com/waleedkorashy/OutfitMaker

- Built and deployed a full-stack fashion storefront: a React + TypeScript (Vite, Tailwind CSS) frontend, an ASP.NET Core (.NET 10) REST API with EF Core and SQL Server, and a separate Python Flask AI microservice — live end-to-end (React on Cloudflare, API on Windows hosting, AI service containerized).
- Implemented "Find My Size," a RandomForest classifier that predicts a shopper's correct clothing size from body measurements (weight, age, height, waist, hip, body shape).
- Implemented "AI Style Finder," a MobileNetV2-based visual similarity search: shoppers upload a photo and get the closest-matching catalog items via k-nearest-neighbours.
- Delivered real commerce logic — accounts, favorites, and cart/checkout with atomic per-size stock reservation — secured with JWT authentication and engineered to run within free-tier hosting limits (512 MB memory cap, cold-start handling).

TaskFlow — Real-Time Kanban Project Management App | *Personal Project*

Live Demo: taskflow-d60.pages.dev | **GitHub:** github.com/waleedkorashy/TaskFlow

- Built a full-stack Kanban app (Projects → Boards → Columns → Tasks) with an ASP.NET Core 10 / EF Core API in a layered Controller-Service-Repository architecture, and an Angular 22 frontend using standalone components, signals, and Signal Forms.
- Implemented real-time multi-user sync with SignalR, so drag-and-drop task moves and board edits appear instantly for every teammate viewing the same board — no polling or manual refresh.
- Built secure authentication with ASP.NET Identity and JWT, including email-based OTP verification and password reset (hashed, single-use, 5-minute-expiry codes) delivered via Gmail SMTP.
- Added team collaboration features — email invitations, role-based permissions (owner vs. member), task comments, and color-coded labels — and deployed the API to Monster ASP.NET (Windows) with a PostgreSQL (Neon) database, and the Angular SPA to Cloudflare Pages.

CERTIFICATIONS & TRAINING

Back-End Development Bootcamp — ASP.NET (200 hours) | *Learnit Academy & Career 180 (2024–2025)*

- Built and maintained web applications across ASP.NET Core, ASP.NET MVC, ASP.NET WebForms, and ASP.NET Web API, applying OOP and SOLID design principles.
- Worked with Entity Framework and LINQ against SQL Server/T-SQL for data access, and built/consumed REST APIs (JSON) tested with Postman.
- Built front-end interfaces with HTML5, CSS3, JavaScript, jQuery, and Bootstrap, with introductory exposure to Angular/React, and deployed applications to IIS.

Foundational C# with Microsoft | *freeCodeCamp & Microsoft Developer Division (June 2026)*

SKILLS

Languages: C#, JavaScript, TypeScript, Python, jQuery, HTML5, CSS3, SQL, T-SQL

Backend & Frameworks: ASP.NET Core, ASP.NET MVC, ASP.NET WebForms, ASP.NET Web API, Entity Framework, LINQ, SignalR, ASP.NET Identity

Frontend & Frameworks: React, Angular, Bootstrap, Tailwind CSS, Vite

Databases: SQL Server, PostgreSQL, T-SQL, relational database design

APIs & Auth: REST APIs, JSON, JWT authentication, Postman

AI / Machine Learning: TensorFlow/Keras, scikit-learn, RandomForest, MobileNetV2 embeddings, k-NN similarity search

Cloud & DevOps: Docker, Cloudflare Pages, IIS, Windows hosting, Git & GitHub, Visual Studio

Networking & Security: TCP/IP, DNS, network protocols, information security & privacy fundamentals

Operating Systems: Windows, Linux

Other: OOP principles, SOLID principles, Agile basics

Soft Skills: Communication, Teamwork & Collaboration, Problem-Solving, Time Management, Adaptability / Fast Learner, Attention to Detail

LANGUAGES

Arabic — Native

English — Fluent
